
Exam Solutions S2

chapter 16 first differential -order equations - overview in section 4.7 we introduced differential equations of the form $y' = f(x, y)$, where f is given and y is an unknown function of x . when f is continuous over some interval, we found the general solution by integration, $y = \int f(x, y) dx + C$. in section 7.5 we solved separable differential equations.

9.1 introduction to integer programming - the concept of lp relaxation of an integer programming problem plays a key role in the solution of ips. definition the lp obtained by omitting all integer or 0-1 constraints on variables is called
